

# THE FUTURE OF AUTOMATED WASTE DISPOSAL

## WHAT IS IT?

Waste Coordinator is the only system that automates and digitalizes the entire oilfield waste workflow.

Waste Coordinator is a cloud-based SaaS platform that uses a combination of your cost data as inputs and our algorithms to optimize the total cost of trucking and disposal on every load with a streamlined end-to-end workflow.

## BENEFITS

**Reduce Costs** by digitalizing and optimizing the end-to-end waste disposal workflow

**Automate** scheduling & dispatching of produced-water loads

**Empower Operators** to manage assets. Less time dealing with paperwork and admin tasks

**Generate Revenue** by marketing your excess disposal capacity to other producers

**Streamline Invoicing** approval process to manage by exception

**Full Digital Transparency** into the field, facilities, trucking vendors and GHG metrics

# HOW IT WORKS

**Monitor** waste disposal requirements and real-time facility information to optimize every load

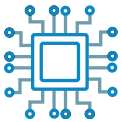

**Schedule** your daily load plan and trip routes with intelligent scheduling

**Dispatch** automation to book loads to any facility quickly and easily

**Track** loads and gather data immediately when the trip has been completed

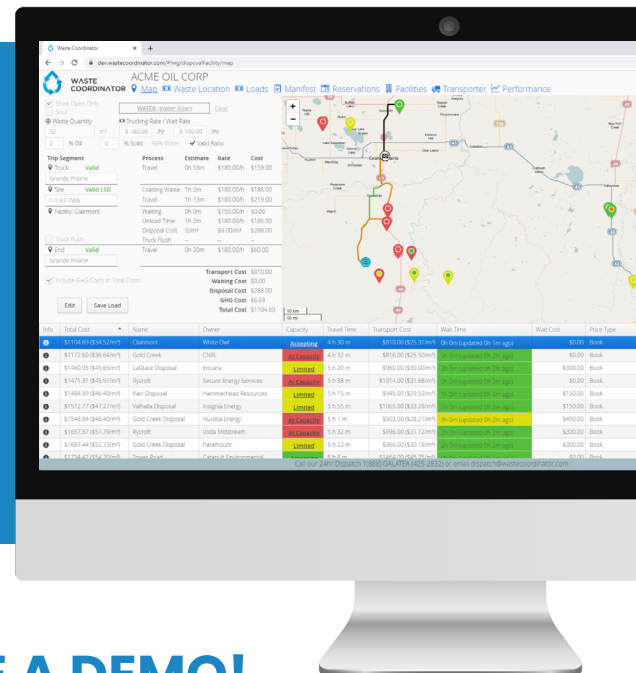

**Automate** invoice approvals by comparing estimates to actuals and manage by exception

**Analyze** your data, track & trend operator, facility and environmental performance

## KEY FEATURES

- Tank Level Management & Alerts
- Optimized Route Plans
- Digital Manifests & Truck Tickets
- Mobile Browser Truck Driver Interface
- Considers Wait Times & Capacities
- Facility Reservations
- Automate Invoice Approvals
